

What is BOBO?

We are contracted to operate, on your behalf, the full supply chain including billing ingestion, contract checks, financial health, cost allocation, re-distribution and re-invoicing production. You retain procurement activity inhouse, and perform collections and supply chain settlement yourselves.

What does the BOBO process look like?

1. We receive Customer suppliers' electronic billing data
2. We perform real-time contract price checks on consumed resources vs. contracted/provisioned resources
3. We balance the charges as required (i.e. monthly/quarterly)
4. We raise any exceptions and credit requests required for Customer finance team to process with suppliers
5. We reallocate costs to the correct project owner / budget code / business unit in your Customer Entities with the correct local currency and taxation

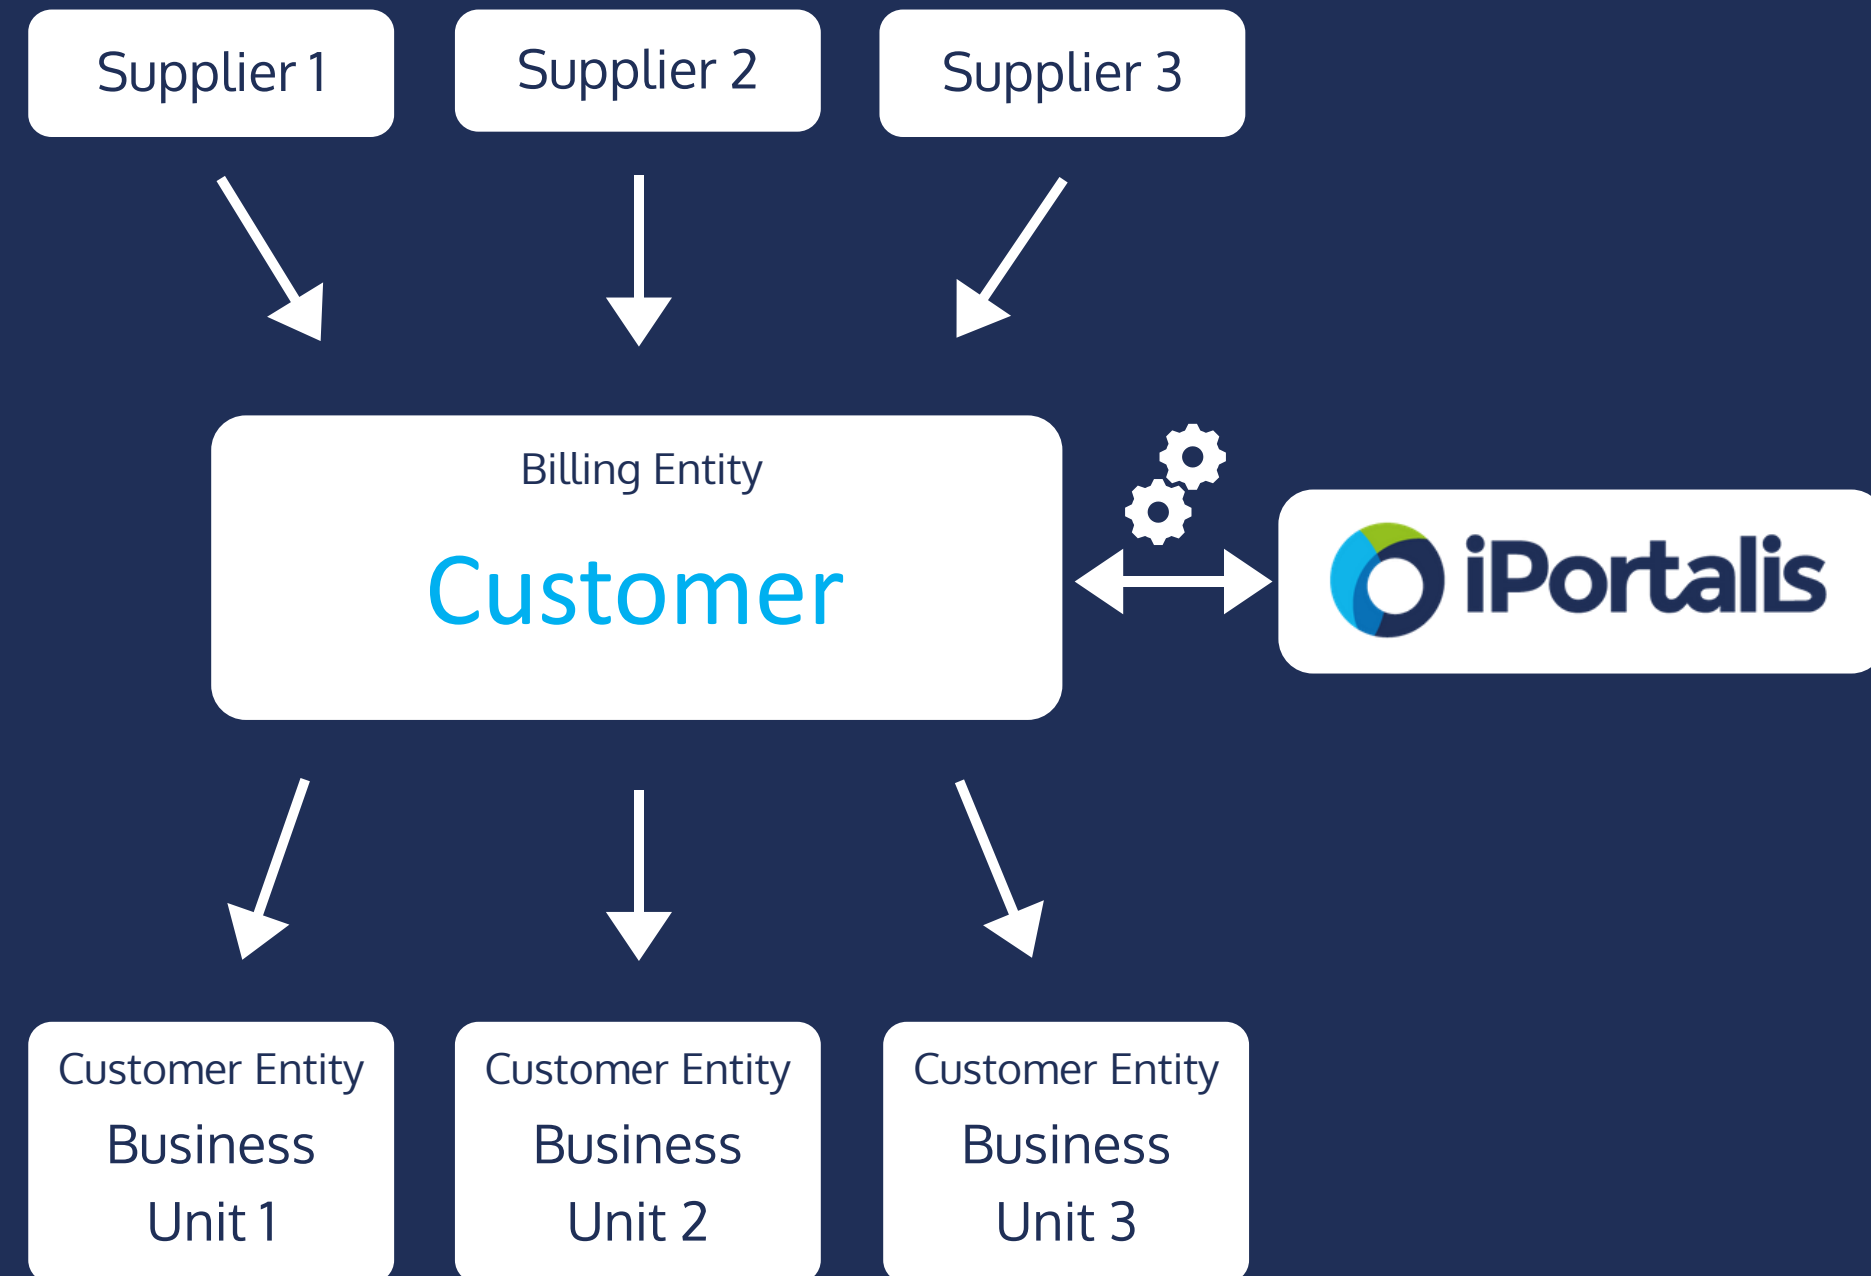

We can then either:

Export the raw data to your own billing platform (i.e. SAP etc) to generate invoices and send directly

OR

Generate and send company branded invoices on your behalf

Billing on behalf of (BOBO)

What is BaaA?

We are contracted as an aggregator in your supply chain where we assist and operate procurement management, SLA governance, financial health and cost allocation, re-distribution, invoicing and collections. You retain operational support direct from the supplier and we work to reduce overall costs.

What does the BaaA process look like?

1. We receive electronic invoices directly from your suppliers
2. We perform real-time contract price checks on consumed resources vs. contracted/provisioned resources
3. We balance the charges as required (i.e. monthly/quarterly)
4. We raise any exceptions and credit requests required before invoicing Customer Entities
5. We reallocate costs to the correct project owner / budget code / business unit
6. We invoice your Customer Entities in the local currency with relevant tax treatment
7. We perform collections
8. We pay the suppliers

Billing as an Aggregator (BaaA)
